

#### Editorial and Local.

Stephen P. Edlin's nomination for Secretary of War has been confirmed by the Senate.

There will be a big turn out at the laying of the corner-stone of the new Democrat building at Albuquerque to-morrow.

The heaviest snow on record is said to have fallen in northern and eastern New Mexico the first of this week. All trains were again blocked.

Young Kit Carson, who killed his father-in-law and wounded his wife's mother in Colorado a short time ago, has been captured and taken to Trinidad.

W. H. Soehren, of Santa Fe, was married to Mrs. Ella J. Otto, widow of the former sheriff of Del Norte county, California, last Saturday evening.

Senator Plumb, one of Kansas' great men, has joined the silent assembly where no speech is made, no vote taken, but where when the roll is called, there will be no absentees.

The Old Abe Eagle, of White Oaks, is after Dr. J. W. Long, of Roswell, with a red-hot poker, of large dimensions. If the paper is correct in its statements, Roswell should bid him a hasty good bye.

Las Vegas has two Boards of Trade. One is a whiskey shop bearing that name, the other an organization of citizens formed to enthrone eastern people on the manifold advantages possessed by the Meadow City. Possibly the two Boards of Trade work together when it comes to "enthusing."

An exchange pointedly remarks: "Every time a man shoots himself because a girl refuses to marry him, the number of worthless husbands there would have been in the world is reduced. The men who neglect their wives and their wood piles to become mashing or political bums, are the kind who, when they were young and in love, vowed to blow their brains out if they were refused."

One of the greatest obstacles to placing the bonds of irrigation and other New Mexico schemes is the Alien act. The syndicates in the east in which foreign capital is not placed, don't invest in such enterprises as a rule.—Albuquerque Democrat.

It is a harmful law. It has kept millions of good dollars from investing in New Mexico alone. Let the present congress see that it is repealed.

To-morrow evening there are festivities attending the laying of the corner-stone of the Albuquerque Democrat's new home, will take place. The Flambeau Club will be out in procession, pyrotechnics will be taken externally and internally, speeches will be made, deposits placed in the corner-stone, music furnished and refreshments served. May the Democrat be prosperous in its new home when completed, and long enjoy the business it has built up by hard licks and "Keeping everlastingly at it," is the wish of the Rustler. By the way, Col., please put a copy of this Christmas Rustler, in the corner-stone. It might be resurrected in the next century and would be valuable as a curiosity!

## Poison in the Kitchen.

No article entering so generally into the food of every household is so generally and villainously adulterated as baking powder. These adulterated powders are shoved upon the public with the greatest persistency.

Throbbing advertisements in newspapers claiming this brand or that is absolutely pure, backed by analyses and certificates, and yet they are adulterated with ammonia or alum. It is to be hoped the law will take hold of these merciless manufacturers and punish them for destroying the stomachs of the unsuspecting consumer.

Amid all this fraud and deceit Dr. Price's Cream Baking Powder stands almost alone battling for pure food and continues to furnish a pure cream of tartar powder at almost the same cost to the people as the ammonia and alum powders are sold at, yet it costs much more to manufacture.

Dr. Price's Cream Baking Powder is of the highest strength. It produces the largest amount of leavening power attainable in a pure baking powder. It is free from ammonia or any other adulteration. No powder does such work. Housewives who have tested all use Dr. Price's only.

The world likes to see men jolly, good-natured and good hearted. They are the world's true men. They may all have their faults—their little weaknesses—but when it comes to a decision between right and wrong, they are generally on the side of right. Then there is the surly, mean disposition who seem always desirous of looking and acting on the dark side. There is no reward for meanness except punishment, so what is the inducement to be mean? We had all better be cheerful, even if the present or the future does seem a little cloudy. The sun may shine out brightest when we least expect it.

The silver convention at El Paso was largely attended by representative mining men and citizens from the Southwest, although the Colorado snow blockade delayed trains to such an extent as to prevent the attendance of many New Mexico, Colorado, Utah and other delegates. However many good men got together and held a meeting which should have a good influence on future legislation. Resolutions declaring for the free and unlimited coinage of silver were passed, and New Mexico's popular Gov. Prince made himself more popular with the convention by openly declaring his sentiments in accord with the resolutions, as well as those passed asking the repeal of the Alien act. The convention was harmonious throughout and a success.

The following receipt sent out by W. H. H. Llewellyn, secretary of the World's fair commission of New Mexico, for preserving fruits in their natural size and condition, is of value to everyone. It is given for the information and instruction of those who wish to prepare fruits for the great exhibit and to all counties the commission will supply glass jars suitable for preserving the fruit. Here is the way the water is prepared into which the fruit is put, and it is very simple: "Take any good water-tight barrel, closed at both ends. Insert a faucet at the bottom, and on one side saw an opening. Make the lower part of the opening to fit an inch board; the upper part to fit a saucer. Insert a piece of board about four feet in length, so that it extends at least twelve inches into the barrel. A cleat should be nailed across the outer end, to prevent its slipping into the barrel. Fill the barrel up to the level of the opening with water. Now place a saucer two-thirds full of ordinary yellow sulphur on the board, sprinkle over it a little common potassium chlorate. Light the sulphur and push it along the board till it is inside the barrel. Then cover the barrel closely with an old blanket or quilt, winding it around so as to prevent the escape of the sulphur fumes. Repeat this burning several times till the water is strongly impregnated with the sulphur and tastes and smells strongly. Then draw off the water into glass jars. Add an ounce or two of powdered alum to each gallon jar."

The newspaper that does not try to make its community better by denouncing outlawry, does not do its duty. It is the plain duty of any local newspaper to condemn public or private wrong doing, and the newspaper's advice will generally if followed, benefit the wrong-doers themselves.

#### Railroad Rustlings.

Gen. Melly has gone east, we understand, to have a conference with the Santa Fe Southern people regarding the extension of the road.

A man well posted offered to bet the editor of the Rustler, this week, that the Atchison, Topoka & Santa Fe would be running trains into San Pedro within six months from January 1st, 1892.

El Paso has secured the survey of the road from that city to White Oaks, which has recently been concealed by the contractor on the old line. Such is the substance of a telegram to O. L. Houghton.—Optic.

There is but two things for the Santa Fe Southern narrow gauge to do: Abandon its property and throw it away, or give it some value by extending the line to where it can get business. The former they are not likely to do and throw away \$150,000 worth of bonds with it—nearly sufficient to complete the line through the county, besides, with a hundred miles of road completed through a good producing section instead of thirty miles running through a section that produces nothing but barros and Pueblo Indians, would be two quite different things so far as the possession of a valuable piece of property is concerned.

#### Business Pointers.

Go to Mrs. Doyle's to buy your Groceries. Good goods, full weight and popular prices.

Colorado Saloon, Santa Fe, N. M.,

U. S. Bond Sour Mash Kentucky Whiskey 103 proof 2.50 per gallon. W. H. McBrayer Superior 89—101 proof \$4. per gallon—84, 108 proof, \$6.00 per gallon.

Established 1862. Incorporated 1876. THE COLORADO IRON WORKS. Works Office Thirty-third and W. 23rd Sts., Denver, Colo.

Our manufactory being situated at the base of the Rocky Mountains contiguous to the greatest mining camps in the world, we are so situated, we can and do see the plants we build in practical operation almost daily, therefore our machinery has been perfected in all the little details up to date which make our machines a success and others failures. We come daily in contact (not with the stockholders who live in the east, but) with the users of mining machinery, enabling us to adopt improvements far in advance of other manufacturers situated farther east.

## CONCENTRATING,

LATEST IMPROVED MINING, SMELTING AND HOISTING MACHINERY. Any Capacity or Magnitude Required.

Air Compressors, Rock Drills, Geared Hoisting Engines, Portable Hoisting Engines, Steam Mine Pumps, Cornish Mine Pumps, Ventilating Machinery, Mining Tramways, Hudson Wire rope Tramways, Standard Blake Crushers, Dodge Crushers, Revolving Sizing screens, Jigging Machines all kinds, Vanning Machines, Cornish Rolls, forged steel tires, Elevators, Gold Stamp Mills, Silver Stamp Mills, Concentrating Mills, Chlorination Works, Tullock & Challenge Ore Feeders, Ore Sampling Machinery, Water Jacket Smelting Furnaces, Roasting Furnaces, Lead Smelters, Copper Smelters and Smelting Supplies, Mining and Milling appliances of every kind and description.

## The Company Pays The Freight.

On their COMMON SENSE NEW STEEL WHIM. All Complete for 125—freight prepaid to any railroad station in Colorado, Wyoming, Nebraska, New Mexico, Utah, Texas, South half of Idaho, Kansas, South Dakota. All stations east of the Mississippi River—complete for \$140, freight prepaid to any railroad station in Arizona, Nevada, Washington, Oregon, Northern Idaho, Montana, North Dakota.

No cog wheels or clutches to break. Ninety per cent. of this Whim is wrought iron and steel, and will spring or bend instead of breaking, and besides can be repaired at any blacksmith shop should breakage occur. It can be packed anywhere a jack can go, the heaviest pieces weighing about 100 pounds. Total weight 600 pounds.

With one horse 25 tons can be hoisted 300 feet, on each shift. It is just as safe as an engine. Over 1800 in use, some running eight years without one dollar's expense.

We make two, four and eight horse power whims for heavy mining—also derricks whims and everything pertaining to horse-power hoisting. Buy a good whim and put more money into underground work is the way to open up a mine and make it pay. For circulars and cuts giving full information, write to The Common Sense Whim Mach. Co., Denver, Colorado.

(All Goods formerly manufactured by The Common Sense Whim Machine Co., are now made by the Colorado Iron Works, under royalty.)

STEEL ORE BUCKETS. \$2500 worth of special machinery to erect them out. These buckets have no hammer dents in them, consequently all parts will wear evenly. Remember every hammer dent makes a hole. Size A holds 400 lbs. granite rock, and suitable for a shaft or small steam hoister. Price, \$1000 net cash with the order, with freight paid to any railroad station in the United States. Also larger sizes. THE COMMON SENSE MINING MACH. CO., 301 and 303 W. 23rd St., Denver, Colo.
